PERSONAL STATEMENT

During my time at University I have undertaken enthusiastically a large quantity of projects and assignments while working in groups, which has since improved my organisational and communication skills in a working environment. I have a friendly, upbeat personality which mirrors onto whom I am conversing with, an example of this would be at A. Shared & Sons Limited, Colchester. I believe it is a necessity to adapt to any task at hand efficiently and effectively, while keeping a keen interest to broaden my knowledge.

Out of University, my most enjoyable passion is travelling, usually adventuring out to other countries with family or friends and taking an interest in the different cultures, landmarks, and the people I meet along the way. In my pastime, I practise guitar for my love of music, reading factual novels, as well as keeping a healthy lifestyle at the University gym. I dedicated my younger years to training in Judo, withholding a strict self-discipline.
